What is IRIS Conductive Education?

IRIS Conductive Education is an early childhood education programme for children with Cerebral Palsy and other motor disorders. Conductor staff work with children and their families to teach children how to develop and maintain skills for living. The programme encourages and motivates children to develop and achieve to their greatest potential, and to live a full and happy life. To find out more about IRIS go to www.iris-health.org.nz. To find out more about Conductive Education, go to www.conductive-education.org.nz.
